

New Uhthoff Trail Gates Installation!

New trail gates will be installed starting on October 15th at the Wilson Point Road trail head. This work is anticipated to take up to two weeks to install the 27 gates. Gates will be installed along the full length of the trail by Western Mechanical.

Please do not pass through the workers construction area!

Once the trail gates have been installed – the gates will be closed.

The new gates will allow pedestrians and bicyclists to pass through the gates.

We hope you will enjoy this new improvement allowing better access spring, summer and fall!
